- U gornjem izborniku kliknite na ikonu **Internet**, a zatim na opciju **Access data** gdje je potrebno upisati ADSL korisničko ime pod **Username** i lozinku pod **Password**.
- **Enable PPPoE Passthrough** postavku ostavite odznačenom (uključuje se jedino prilikom postavljanja routera u *bridge* način rada).

Potvrdite unos podataka na **Save** i pričekajte dok se router spoji na internet.

The screenshot shows the configuration interface for a Speedport W 724V router. The top navigation bar includes 'Overview', 'Internet', 'Telephony', 'Home network', and 'Settings'. The 'Internet connection' section is active, showing a '3G/LTE Connection' and a 'Security status' (Firewall active, WLAN encrypted). The 'Access data' section is highlighted with a red box and contains the following fields and options:

- Name of the provider:** [Empty text box]
- Username:** xxxxxx@hinet-dsl
- Password:** [Masked with asterisks]
- Enable PPPoE Passthrough:**  (unchecked)
- Router settings:**
  - Always online
  - Automatically disconnect

Additional text in the 'Access data' section includes: 'Depending on the provider, you may have to perform additional settings.' and a warning icon with the text: 'With this setting, you cannot be reached using the set up Internet telephony as long as the Internet connection is disconnected.' Buttons for 'Delete', 'Cancel', and 'Save' are located at the bottom of the configuration area.
